

Energy Engineering

One of the specialties at the Faculty of Engineering of Mingachevir State University is Energy Engineering. Energy is an industry engaged in the production, transmission and distribution of electricity and heat. Nowadays, there is a great demand for electricity. It is impossible to imagine any industry without electricity. As you know, Mingachevir is the energy center of the Republic of Azerbaijan. Azerbaijan Thermal Power Plant and Mingachevir Hydroelectric Power Station operate here. Mingachevir State University closely cooperates with these stations. The personnel trained by the university in the specialty "Energy" mainly work at the Azerbaijan Thermal Power Plant, and our future graduates have great opportunities to work here.
